

BIOBARRIER®

## FIRE HYDRANTS

Is this a common site in your municipality?

Many municipalities in Canada have bylaws stating that access to fire hydrants must not be obstructed and be kept clear at all times so that fireman have easy access to them in case of emergency.

See how Biobarrier can help.....

*Quick and easy to install. One roll of Biobarrier (39" x 20') is sufficient for two fire hydrants. The approximate cost is \$60.00 per hydrant.*

*Install Biobarrier one metre around the fire hydrant. Cover Biobarrier with 2" of mulch, soil or stones.*

Biobarrier's performance is guaranteed for 15 years, but expect this period to last 25 and perhaps 30 years.
