

BIOBARRIER®

PARK STANDS & BLEACHERS

WEED & GRASS MAINTENANCE

Grass maintenance and weed removal under stands or bleachers is always a laborious task. The City of Terrebonne had to find a permanent solution to the problem.

The only solution was to install **Biobarrier**.

Stands before the Biobarrier installation.

Removal of grass in the affected area.

Installation of Biobarrier. Plastic pegs (which are provided with each roll) were used to secure the membrane in place.

2" to 3" of crushed stone was then used to cover the Biobarrier membrane.

Biobarrier's performance is guaranteed by the manufacturer for 15 years, but you can expect it to last for 25 and even 30 years!
