

BIOBARRIER®

## SEPTIC TANKS

Tree roots can be very damaging to septic tanks.

Watch this brief video to see the effect of tree roots on septic tanks.

The only guaranteed solution to prevent the intrusion of tree roots is BIOBARRIER.

Biobarrier is simple to install...

- Dig a trench all along the perimeter of the septic field to a depth of 39" minimum (1M.) which could extend to 58" (1.48M.) depending on the types of trees that are growing near the field.
- Install Biobarrier vertically and use the provided pegs to secure it in place.

Biobarrier's performance is guaranteed for 15 years, but you can expect it to last for 25 and even 30 years!
