

BIOBARRIER®

**ULTRAMAR SERVICE STATION**  
Piedmont, QC

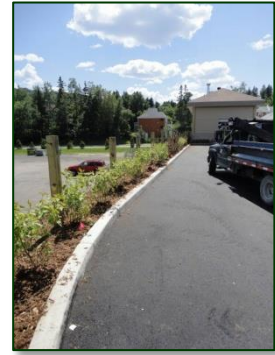

Ultramar have always been very proud of the landscaping at their service stations across the country, but there has always been a concern regarding the control of weeds. The weed growth at these installations needed to be removed on a regular basis and some had reached the point beyond control. With maintenance costs rising, Ultramar needed a long term solution, and after much research, they opted for Biobarrier.

*Biobarrier is placed in the desired areas.*

*Sod and mulch (maximum thickness of 3') were added in and around plantation beds and trees.*

**Biobarrier's performance is guaranteed by the manufacturer for 15 years, but you can expect it to last for 25 and even 30 years!**
