

BIOBARRIER®

UNDERGROUND RESERVOIR

PROJECT: St. Étienne School
Christophe Colomb St.
Montreal, QC

CONTRACTOR: Les Entreprises J. Piccioni Inc.
46, Ave. Milton
Lachine, QC
514-481-9905

The contractor received a mandate to install a large water reservoir underground on the site of the school. Since large mature trees were located nearby, the architect specified Biobarrier for long term performance against root intrusion.

The reservoir was completely wrapped with Biobarrier before the backfill and crushed stone was set in place.

Biobarrier's performance is guaranteed by the manufacturer for 15 years, but you can expect it to last for 25 and even 30 years!
