

**GORDIE HOWE INTERNATIONAL BRIDGE**  
**Electrical Power Line Relocation**  
Windsor, ON

The Gordie Howe International Bridge which spans Windsor and Detroit required that a 115 KV electrical power line needed to be relocated.

West Windsor Hydro is responsible for this power line and opted for **Typar Biobarrier** in order to control vegetation growth under the fence sections.

Matassa Inc. of Oldcastle, Ontario was hired for this project.  
**29,820 sq.ft.** of Typar Biobarrier was set in place for long term vegetation control.

Using the Typar Biobarrier assures West Windsor Power that no vegetation maintenance will be required for many years to come. As a matter of fact, Typar Biobarrier is guaranteed for 15 years!

For additional information please visit our [website](http://www.dbbinc.ca) where you can view more than 40 different Typar Biobarrier applications.
