

GRASSPROTECTA

Community Garden

Burlington, ON

The municipality of Burlington, ON wanted to provide safe and easy access to the community garden for people who use wheelchairs, walkers and canes. The ground site of the community garden needed to be leveled and in order to achieve this objective the city officials opted to install GrassProtecta.

Did you know that community gardens contribute to a healthy lifestyle by:

- providing fresh, safe, affordable herbs, fruits and vegetables
- helping to relieve stress and increase sense of wellness
- getting people active, which improves overall physical health
- providing social opportunities that build a sense of community and belonging
- giving people an opportunity to learn and share knowledge on gardening, nature, and cooking

Next spring, grass will be seeded with THYME and 4 to 5 weeks later the surface will have a nice green covering while still maintaining a level, stable surface.

Additional information regarding GrassProtecta can be found on our [website](#).

All TYPAR grass and ground reinforcement products are suitable for use as a source control solutions in LID and NPDES applications.
