

# TYPAR GEOCELLS

TYPAR GEOCELL GS cells can be filled with soil or aggregate material to provide slope protection and load support. Suitable for slopes up to 45 degrees (1:1 slope) and on horizontal surfaces to provide a stable base for traffic and an even load distribution.

Heavy vehicle loads up to H25 loading, off-road industrial machinery

## MUNICIPALITY OF RAWDON, QC Pedestrian and Maintenance Vehicle Pathway

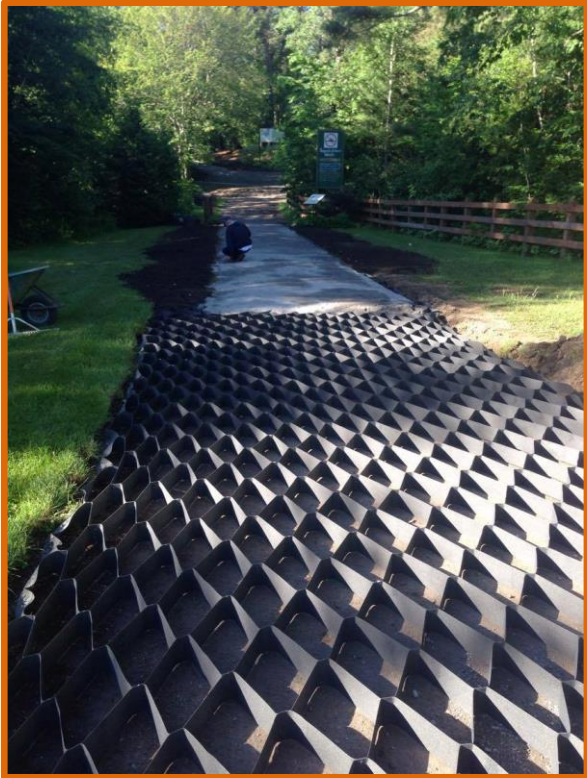

Pierric Bruneau Landscaping contractor opted for Typar Geocell as a solution to reinforce the ground surface of the pathway. This will provide a long lasting solution to resolve the constant deterioration of the pathway.

### Installation

#### *Surface Preparation*

*Installation of Typar Geocell units*

*Finished Product*

All TYPAR ground reinforcement products are suitable for use as a source control solutions in LID and NPDES applications.
